

TERRE SICILIANE

"By day the hot sun fermented us," as T.E. Lawrence wrote of the Arabian desert. This co-ferment of mostly Nero d'Avola (with a touch of lightening acidity Grillo) grows on white limestone on the coast of SE Sicily. Spicy, musky red-fruits, and like an oasis, refreshing and invigorating. Good with a slight chill, too. Certified Organic.

FUSO...characterful daily drinkers from our producer friends in France and Italy!
